Kathleen:

I thought that the last workshop would be in Portland and another location but all others would be in Portland. I believe that decision can be revisited based on resources.

Subject

FCR workshop locations

Hello everyone,

Is it the expectation that all of the Workshops from now on will be in PDX? We are thinking about our coordination and outreach efforts for future workshops and letting folks know the correct location will be important.

what's the current thinking on this?

Kathleen

**Subject:** Policy Decisions and Issues document for review

Hello there,

Attached is the revised version of the policy document Becky first put together. In this document, we lay out the difference and relative importance of different types of policy questions and also categorize the public's input. This document will constitute our response to all the public's suggestions during workshop #2.

Please review at staff and manager level and send comments to me by **June 27th COB**. Depending on the nature of the comments, we'll hopefully just have a short meeting sometime before July 6th to finalize this document. I think the definitions of the categories on the first page are of particular importance. I have included all of the questions asked at workshop #2.

Finally, the meeting to finalize the document will be a good time to touch on how DEQ intends to use this document at the EQC meeting on August 17th. We can discuss the EPA and CTUIR roles at that meeting if you want to participate.

Thanks,

Jordan
